

# MULTI V™ PLUS Systems

- **Multi V™ Plus** is technically advanced with maximised cooling load, high efficiency and very economical systems.
- **Multi V™ Plus** was developed to focus on large and high rise buildings.

## Highly Efficient Linear Control

Compressors and Outdoor fans

Compressor Controls

## Maximum Pipe Length & High Elevation System

- Sub Cool Interchanger Bridge
- After Reliability test, installation possible up to 120m long pipe, 50m altitude.

## Saving Installation Space

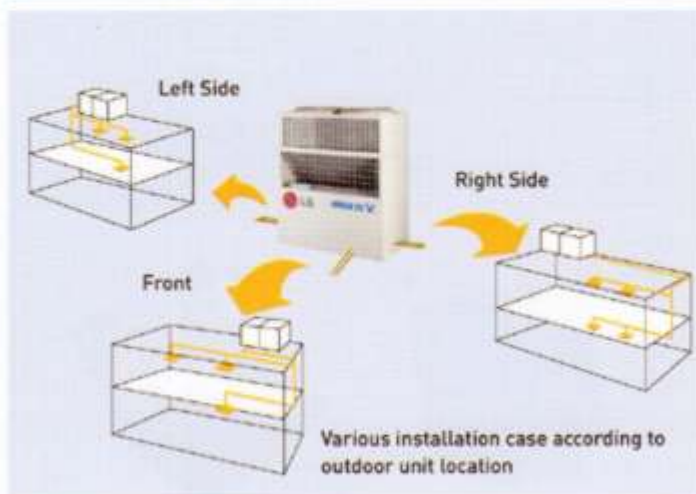

### Existing Model

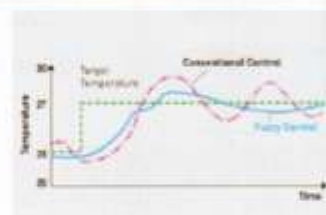

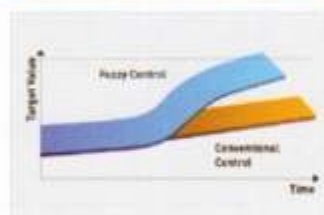

### MULTI V PLUS

## Flexible Pipe Installation in 3 Directions

## Intelligent Fuzzy Control System

- In start up fuzzy control senses ambient & room temperature and achieves target in shortest time as per the load condition.
- Stabilized indoor air temperature to optimum level.

## MULTI-V SPACE & MULTI-V SYNC ALSO AVAILABLE
